Shaik Mahimuda

About Me

As a driven and imaginative third-year B.Tech Computer Science Engineering student at Newton's Institute of Engineering, I bring a strong academic record with a 70% CGPA. My background includes a valuable second-year internship where I honed my skills in Java Full Stack development. Currently, I am deeply engaged in learning web development, Artificial Intelligence, and prompt engineering, continually expanding my technical horizons. My unique blend of technical ambition and creative expression truly sets me apart; I approach learning with discipline and curiosity, not just aiming to master code or excel in exams like GATE 2026, but to build something truly meaningful and visually captivating that solves real-world problems .

Skills and Interests

Skills

- java full stack development
- html
- web development

Interests

- technology
- creativity
- excelling in the GATE 2026

Projects

my first personal Project Portfolio website

A foundational web project demonstrating proficiency in HTML for structuring content, including headings, paragraphs, lists, and links. This project served as an introduction to web page design and organization.

basic blog layout (web development practice)

Explored fundamental web development concepts by creating a static blog layout using HTML and CSS. Focused on creating a clean, responsive design for different screen sizes. This project helped me understand CSS styling and layout techniques.
